I am a web developer with several years of experience passionate about web technologies, which influenced my decision to choose the **IT technician specialization** in the technical secondary school, during which in my free time **I kept expanding my knowledge in the webdev field** creating more and more advanced personal projects - from simple websites to entire games. Currently, my goal is to combine this hobby with a professional career, in which I would be able to gather experience in a commercial environment, **further improve my skills and have the chance to learn new technologies**.

SKILLS

Technologies I use on a daily basis

- HTML
- CSS, Sass/SCSS (BEM, Responsive Web Design)
- JavaScript (ES6 and above)
- React, Redux, Router
- Phaser 3 (game framework)
- Parcel, Webpack
- REST APIs
- GIT, npm
- Node.js
- Jest (test framework)
- Express
- MongoDB

Technologies I used before

- jQuery
- Bootstrap
- Gulp
- Next.js

Technologies I'm planning to learn in the future

- React Native
- Firebase
- TypeScript

EDUCATION

2015 - 2019

Zespol Szkol Elektryczno-Elektronicznych w Radomsku
Specialization: IT technician

LANGUAGES

English - advanced
